How to install a Marriage Equality screen saver
* by Iain Anderson, iain@funwithstuff.com

  * This was made with the free Quartz Composer app, available from Apple as part of their Developer Tools.

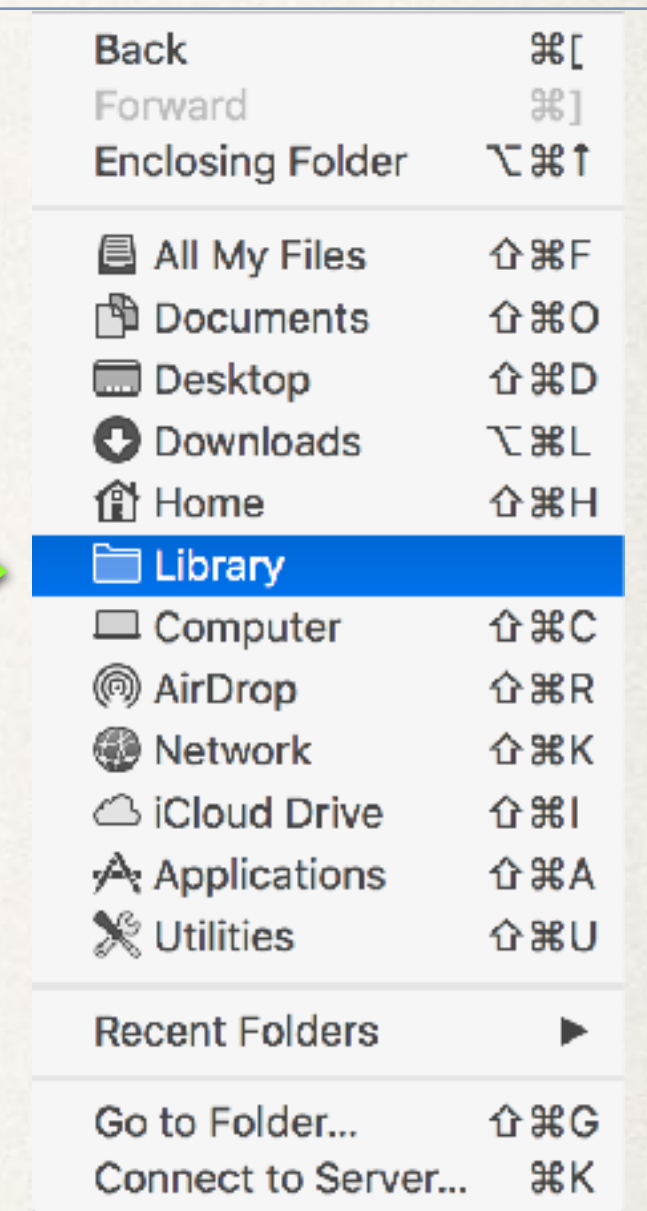

I SUPPORT MARRIAGE EQUALITY

Step 1: Download

* Grab the file here:

  * https://www.dropbox.com/s/xhfqksdao2rh90s/MarriageEquality.qtz?dl=0

* It'll land in your Downloads folder. Keep that window open as you'll need it soon.

Step 2: Find/Create a Screen Savers folder

- The screen saver needs to be placed in your home directory, in your Library, in a subfolder called Screen Savers. The Library folder is hidden by default, though. Step by step:

  - Click on the Finder icon in the Dock.

  - Make a new Finder window with File > New Finder Window.

  - Choose the Go menu, and while the menu is active, hold the Option key to make Library appear. Choose Library.

  - With the hidden Library folder open, make a new folder with File > New Folder.

  - Type "Screen Savers" to name this new folder.

 - Move the "MarriageEquality" file from "Downloads" (in the window you kept open earlier) into "Screen Savers.

Back	⌘[
Forward	⌘]
Enclosing Folder	⌥⌘↑
All My Files	⇧⌘F
Documents	⇧⌘O
Desktop	⇧⌘D
Downloads	⌥⌘L
Home	⇧⌘H

Computer	⇧⌘C
AirDrop	⇧⌘R
Network	⇧⌘K
iCloud Drive	⇧⌘I
Applications	⇧⌘A
Utilities	⇧⌘U
Recent Folders	▶
Go to Folder...	⇧⌘G
Connect to Server...	⌘K

Step 3: Choose the Screen Saver

* Remember that the screen saver appears only when the computer has been idle for a while.

  * Choose > System Preferences, then choose Desktop/Screen Saver.

  * Look for "MarriageEquality" in the left-hand list, then click it to choose it.

 * Set the screen saver to start after a minute or two.

Step 4: Activate the Screen Saver

- To activate the screen saver on demand, you might want to activate a Hot Corner.
  - Click the button below, then choose the top left corner to "Start Screen Saver".

Step 5: Energy Saver

* To make sure your screen saver can be seen, make sure that the Energy Saver settings (also in System Preferences) are set to turn your display off after a reasonable period of time.

  * The settings on the right will turn the display off after 15 minutes.

Step 6: Vote Yes!
